Parent Software

(great Christmas gifts for your family safety)

Filtering and blocking:

Net Nanny 5.1 is available at www.software4parents.com

Cost approximately \$40

Kidsnet is available at www.kidsnet.com

This is paid for and downloaded from the site.

Monitoring Software

Spector Pro 5.0 is available at www.software4parents.com

Cost approximately \$100

This monitoring software records chats, IM's, emails sent and received, web sites visited, keystrokes typed, programs launched, peer to peer file searching and swapping, saving all the above information in a location only the parent has access to. When emails are deleted a separate copy is saved for the parent.

eBlaster 5.0 is available at www.software4parents.com

Cost approximately \$100

This monitoring software provides an activity report that has recorded every email, chat, IM, keystroke, web site accessed, programs launched, and peer to peer use. It also instantly forwards emails chats, IM's and certain sensitive keywords and phrases your child might use.

Guardian Monitor Pro9.0 is available at www.guardiansoftware.com

Cost approximately \$60; is a monitoring program you pay for and can download. This software emails detailed reports of web sites accessed, chats, IM's, and peer to peer use. It also records all keystrokes used and downloaded files.
